PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

Session Procedures Report (S/NF/SK)

PROJECT NUMBER: 8713

SESSION NUMBER: 2

DATE OF SESSION: 15 OCT 87

TARGET COUNTRY:

REFERENCE:

MISSION STATUS:

TECHNIQUE UTILIZED: CRV

SOURCE IDENTIFIER: 011

1. (S/NF/SK) Monitor Tasking: Per original tasking instructions; no amplifying data received.

2. (S/NF/SK) Source Tasking: Source was provided with only the coordinates (supplied) and instructed to spend a good deal of time in Stages I and III. (See the comment below regarding a bad call on the part of the monitor).

3. (S/NF/SK) Summary: The Viewer's summary and sketches are attached.

4. (S/NF/SK) Comments: This target seems unusual and a little strange--the Viewer produced some unique ideograms in Stage I. There was a good site lock-on during the session, but the target itself may possess several, disparate physical/geographic elements. Much care was taken during the session to avoid/preclude AOL. However, the monitor should have used Stage VI tools rather than trying to take a short cut when exploring the "purpose" of the "green energy". Consequently, data subsequent to that cue ("purpose") is subject to AOL. The monitor will not repeat this error.

SESSION SUMMARY

SESSION: 15 OCT 87, 1309-1442hrs

There appears to be a land/water/structure interface at the target site. There is something associated with the structure that is hard, sloping, rounded, and thick (see sketch, page 5). Somewhere in the background, a hard, rough, jagged, very tall, natural feature with a dark, flat, top (see sketch, page 5). Getting the impression of a rugged, mountainous area. Inside the structure is a green energy that is constantly radiating, with waves of pulsed energy. The purpose of this energy is to create a violent, star-burst explosion with colors of red, orange, white and blue.

COMMENTS: This is a very confusing target
